ABOUT
MY WORK

I'm a self-taught web designer and front end developer currently living just outside of Charlotte, NC. I've been designing and coding profesionally for more than seven year. In a previous life I was a journalism major who graduated from the University of South Carolina.

Starting as a junior web designer and working my way up to being my company's only senior-level hybrid, I'm the only person at my company who has both senior front end dev and senior web designer responsibilities. So what does that mean?

Well, among other things it means I creative direct junior members on my team, helping them find the right balance between brand guidelines and innovative designs. It means that I regularly do large scale brand and site launches. It means that I understand how to create an effective, performance-driven design in Photoshop and then turn around and code it into an intuitive front end user experience.

For the last 5 years I've worked at Red Ventures, one of the fastest-growing companies on the East Coast. I've spent the last two years there working closely with medium to large-scale national insurance brands such as Safeco, The Hartford, and Metlife.

However, these days I work directly with AT&T and Vonage as well as conitnue to mentor and train junior and mid-level talent throughout our creative team.

TLDR

YOU'RE BUSY, AND I GET THAT. SO HERE'S WHAT YOU NEED TO KNOW ABOUT ME.

CURRENT TITLE

Sr. Designer / Sr. Front End Developer
